
THE BOUNTY HUNTER LEATHER HAT

Assembly instructions

Difficulty level:	Intermediate
Completion Time	6 - 9 hours

NECESSARY TOOLS

B&W Printer

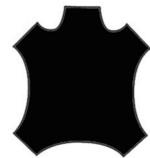

Scissors or a cutter

Hole Puncher (We recommend 1.8 - 2 mm sized holes for this build)

Approx 4 square feet of leather. (We recommend 5 oz leather for this build)

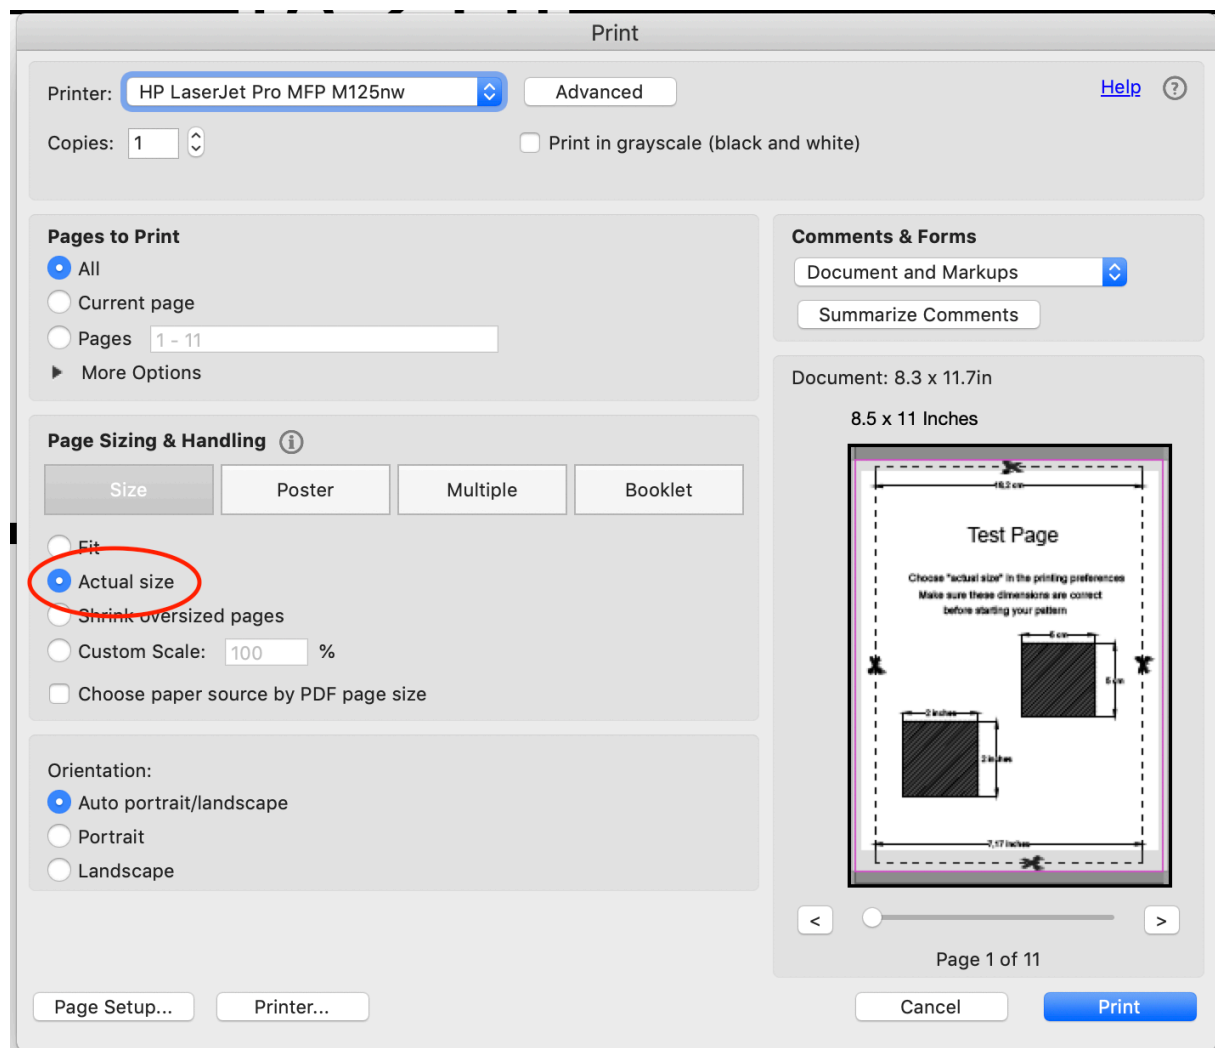

Thread and needles (We recommend 1 mm waxed thread for this build)

1 x 20 mm Buckle, 2 mm aluminium wire and a few rivets

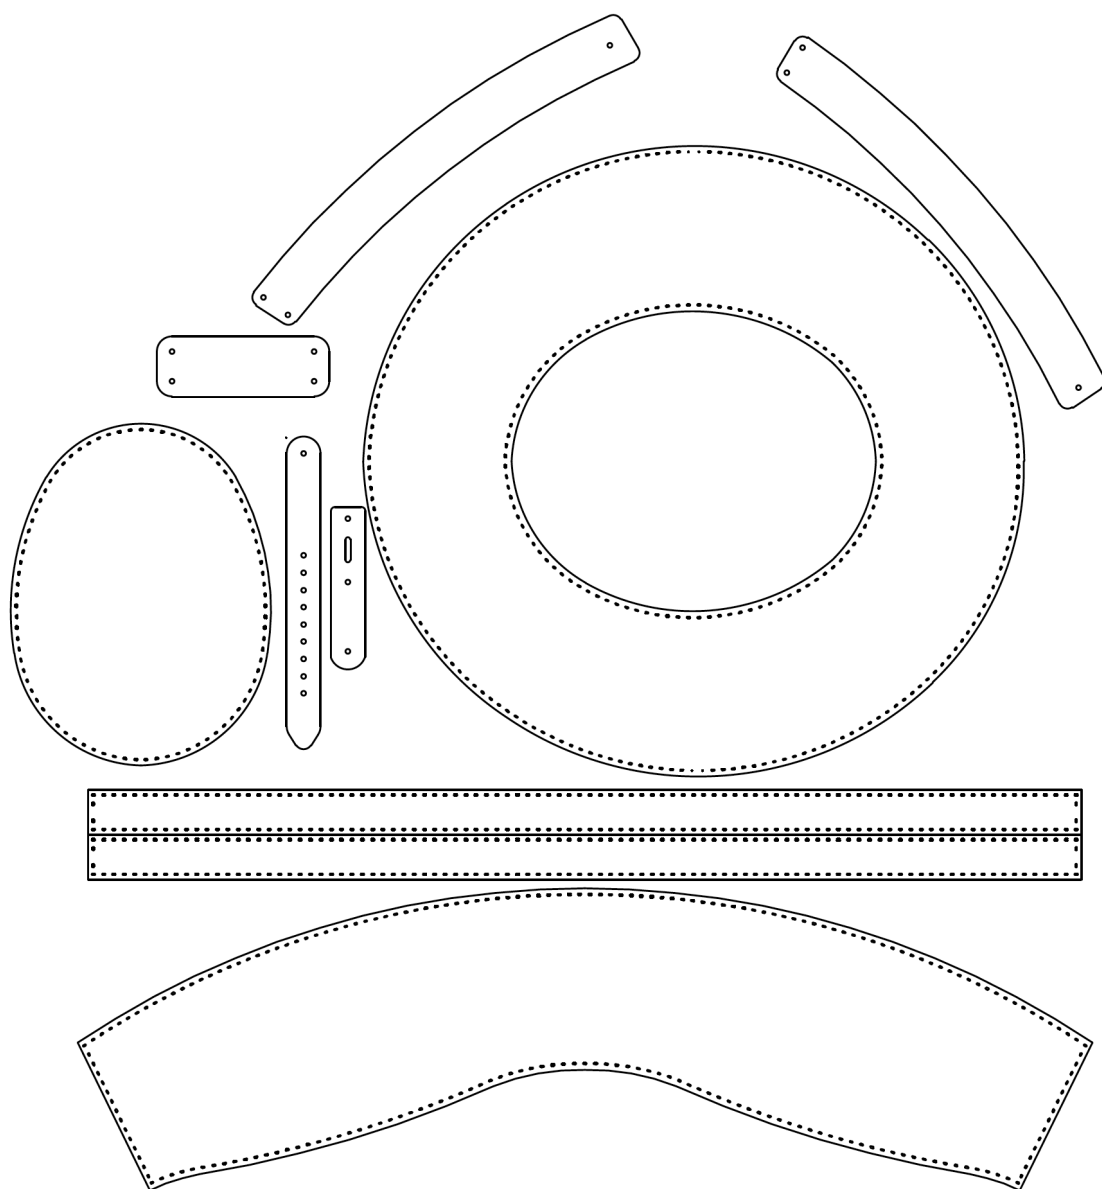

PRINTING THE PATTERN

Set up your paper size to A4 and choose actual size in the printer settings

Alternatively you can use “letter” format which is approximately the same size and will not impact the size of the product significantly

Print all the patterns. Take note that all the large pieces spread over more pages. Use the number codes and the assembly diagram to cut and paste them all together correctly. After you are done you should have all the leather pieces shown below

VERY IMPORTANT

Place the pattern for the crown, or the piece coded from B1 to B4 around your head and see if the size is right **BEFORE** cutting the leather to make sure you chose the right size for you

In order to further help with your build, we filmed the entire process from the start to finish.
Please access your instructional video here:
