Leather Briefcase Lined with Leather & Stiffener

PRESENTATION

- This package contains the PDF pattern and link to a detailed video tutorial that will walk you through the process of making a leather briefcase lined with leather and stiffener.
- The advantage of lining is that you obtain a sturdy bag that will keep its shape over the years.
- It also allows you to use thinner leather that will ensure the bag is lightweight.
- Featuring adjustable strap and handle, this bag can be used as a briefcase, laptop bag or messenger bag.
- The bag contains an interior sleeve with a pocket.
- This project requires around 10.8 sq ft (1 sqm) of 4 oz (1.6 mm) stiff leather for the body of the bag, about the same for the leather lining (I used 0.6-0.8 mm stiff pigskin), around 5.4 sq ft (0.5 sqm) of PITEX Non-woven leather stiffener or other stiffener for leather bags like Texon, around 2.7 sq ft (0.25 sqm) of 2.5 oz (1 mm) leather for the inside sleeve.
- You will need some leather and some lining for the shoulder strap: the longest piece is around 125 cm.
